

VELOCITY

ACTIVE WEAR COLLECTION

LNJ Knits, the knitted fabric division of RSWM Limited, is a key player in the textile industry. With advanced facilities in Banswara and Mathura, and 95 knitting machines, we produce over 9,000 tonnes of fabric annually, ensuring top quality and variety.

Our fabric range includes Single Jersey, Interlock, Rib, Brushed Fleece, Flat Back Rib, Terry, Pique, and spandex-based fabrics, with special finishes like Antimicrobial, UV protection, Moisture Wicking and Water and Stain Repellent.

Our strong backward integration, producing our own cotton, blends, poly spun, recycled poly spun, yarn dyed, and mélange yarns, ensures consistent quality and supply.

Sustainability is crucial in fast fashion. We adhere to zero liquid discharge norms (ZLD) and hold certifications like GOTS, OCS, OEKO-TEX, BCI, GRS and INDITEX. We use recycled polyester, recycled cotton and incorporate garment recycling and garnetting into our processes.

Equipped with the latest machinery, our facilities meet the high standards of the activewear and fashion markets. Our elastane fabrics, yarn dyed and functional textiles are in high demand across the US, UK, Europe and Asia.

Velocity, a groundbreaking active wear fabric collection has been designed for those who push boundaries and redefine limits. Born from a fusion of cutting-edge technology and an unwavering passion for performance, Velocity fabrics seamlessly blend 100% high-performance polyester with up to 25% spandex. The result, an unparalleled range of motion, firm support, and a second-skin feel that empowers you to reach your peak.

- ⚡ Embrace the thrill of the chase as Velocity's moisture-wicking technology keeps you cool and dry, no matter how intense your workout.
- ⚡ Experience the freedom of movement as our spandex infused stretch fabrics adapt to your every stride, leap, and twist.
- ⚡ Feel the confidence of knowing that Velocity's durable construction will withstand even the toughest challenges.

Velocity isn't just a fabric collection; it's a catalyst for transformation.
